

AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

1. (Currently Amended) An integrated telephone system adapted to be housed in a seat of a mobile platform, the system comprising:
 - a ~~housing~~ cradle for housing a telephone handset;
 - a first terminal supported on said ~~housing~~ cradle, said first terminal providing an electrical connection point for ~~[[a]]~~ said telephone handset of said system and a first communication link to a remote transmitter of the mobile platform; and
 - a second terminal supported on a substantially flat portion of said ~~housing~~ cradle at a location readily accessible by a first user substantially adjacent to one of four corners of said cradle, said second terminal providing ~~an electrical~~ a wireless connection point for a computing device of ~~said~~ a first user and a second communication link to the remote transmitter, said system adapted to provide the first and second communication links simultaneously; and
 - a third terminal supported on said substantially flat portion of said cradle substantially adjacent to another one of said four corners of said cradle, said third terminal providing a wireless connection point for a computing device of a second user and a third communication link to the remote transmitter, said system further adapted to provide said first, second and third communication links simultaneously.
2. (Cancelled)
3. (Currently Amended) The integrated telephone system of claim 1, wherein said second terminal ~~comprises an Ethernet interface and provides~~ ~~[[an]]~~ a wireless Ethernet connection.
4. (Currently Amended) The integrated telephone system of claim ~~[[2]]~~ 1, wherein said third terminal ~~comprises an Ethernet interface and provides~~ ~~[[an]]~~ a wireless Ethernet connection.
5. (Currently Amended) A seat mounted to a vehicle, said seat comprising:
 - an integrated telephone system comprising:
 - a cradle mounted in a recessed portion of the seat;

a first terminal adapted to have a wireless communication connection to a communication device and to provide a first communication link to a transmitter located remotely from said cradle, said first terminal located on said cradle; ~~and~~

a second terminal adapted to have a wireless communication connection to a first computing device of a first user and to provide a second communication link to the remote transmitter, said second terminal located on a substantially flat portion of said cradle substantially adjacent to one of four corners of said cradle, said integrated telephone system adapted to provide said first and second communication links simultaneously; and

a third terminal adapted to have a wireless communication connection to a second computing device of a second user and to provide a third communication link to the remote transmitter, said third terminal located on said substantially flat portion of said cradle substantially adjacent to another one of said four corners, said integrated telephone system further adapted to provide to provide said first, second and third communication links simultaneously.

6. (Cancelled)

7. (Original) The seat of claim 5, wherein said communication device comprises a telephone handset

8. through 20. (Cancelled).
